## Documents requested in the Graduate Application

The submission of scanned documents in the registration form must necessarily be in PDF format.

The maximum size allowed for each file scanned (in PDF format) and sent at the time of registration is 3M (3 megabytes)

The only mandatory scanned documents from the application list are the academic files (undergraduate and master's degree for PhD candidates). In addition, the submitted academic file must contain all failures and enrollment cancellations (If there are failures, a statement is also mandatory - signed by the candidate attesting that the submitted transcripts show all failures and enrolment cancellations).

The registration form for Graduate Studies is extensive.

Therefore, only start the process after having the necessary documents scanned in PDF format. Then, when the application finishes, a PDF will be displayed, and an automatic email will be sent.

Below is the list of documents requested:

- Individual registration (CPF) or Passport
- Diploma of undergraduate \* (exceptionally, this can be replaced, temporarily, by Certificate of Completion of undergraduate);
- The academic file of undergraduate
- Diploma or Master's Completion Certificate (if any)
- Master's academic file
- Disapproval Statement (can be handwritten, and there is no defined template).
- Language Certificates - if they have more than one, they must be scanned in a single PDF file.
- Candidate's letter of interest (motivation for entering the course)
- Results on the GRE Physics Test or other internationally recognized exams - if more than one, they must be scanned into a single PDF file.
- Updated Curriculum
